(54) BEHAVIOR INFORMATION PROVIDING SYSTEM

(57)Abstract:

PROBLEM TO BE SOLVED: To provide a system providing information based on a quantitative data concerning the analytic result of the past behavior of a person and concerning the future behavior of the person.

SOLUTION: A biological data detecting part 3 detects electroencephalogram, body temperature and blood pressure concerning the living body of the user of a portable terminal 1. An environmental data detecting part 2 detects temperature, atmospheric pressure and position as data concerning environment around the user. A housing part 8 stores biological data and environmental data of the user corresponding to the behavior record of the user. An advice preparing part 9 provides advices concerning what kind of influence the past schedule of the user gives to the living body, what kind of influence the future schedule of the user gives to the living body or a future schedule idea.
